

Tom Rucker
President
Magna Powertrain

Tom Rucker was appointed President of Magna Powertrain in October of 2019. In this role, he leads Magna International's Powertrain group, which produces transmission and driveline systems, and metal-formed components.

Rucker began his professional experience as a manager for Turn Key Industrial Plants in Germany and Venezuela from 1995 to 2000. In 2000, he joined Magna Powertrain as the General Manager in Saltillo, Mexico. From 2005 to 2009, Rucker held numerous positions within the former new process gear (acquired by Magna) with increasing levels of responsibility.

In recent years, he has held executive-level positions with Magna Powertrain, including senior vice president of metal-forming solutions and transmission systems, and senior vice president for program management & launch excellence, working throughout Europe and North America.

He is a graduate from the Technical University in Berlin, where he received a degree in mechanical engineering and business administration.

Rucker lives in Aurora with his wife and children.
