

Uwe Geissinger
Executive Vice-President
Operational Efficiency

Uwe Geissinger transitioned to the role of Executive Vice President, Operational Efficiency, Magna International on April 1st, 2021. His focus is on topics of operational efficiency, including program management, performance improvements, digitalization and launch readiness. Geissinger brings strong business, program management and customer knowledge to this dynamic portfolio.

Geissinger has been with Magna since 2012 and has held various roles in leading groups, operations and product management. He served as the Senior Vice President Operations for Magna's Power and Vision segment and was the CEO of GFT joint venture. In 2019 he was appointed President of Magna Electronics, a group of Magna International.

Geissinger, who holds German and Canadian citizenship, previously served as Vice President of Operations in Europe for ATS Automation Tooling Systems in Canada and as CEO of Dematic GmbH, among other positions.

Geissinger has a mechanical engineering degree and is a Certified Lean Six Sigma Black Belt.
